Securing Your Website
With Industry Best Tools

Wordfence Security Suite

Wordfence has been protecting the WordPress sites of users since 2012.

As of 2024, Wordfence now protects over 5 million WordPress websites from malware and other malicious software.

Wordfence is a WordPress plugin that protects any website it's installed on from malware, hackers, and other security threats.

It includes a WAF (Web Application Firewall) that is updated constantly to include new firewall rules, and a malware scanner that is continuously updated with new malware signatures, both to detect and protect against the newest threats.

In short, Wordfence secures and protects WordPress websites.

Wordfence is the leading security solution for WordPress websites, highly preferred and recommended by HostWorldServices.

Getting started with Wordfence is easy, and free.

Wordfence is the most popular WordPress firewall and security scanner, protecting over 5 million websites worldwide from attackers targeting WordPress.

Wordfence Free includes an endpoint firewall and malware scanner built from the ground up to protect WordPress.

Wordfence Free receives firewall rules and malware signatures created by the industry-leading Wordfence Threat Intelligence team after a 30-day delay.

Includes Wordfence Central absolutely free to manage the security of your WordPress fleet of websites from one place.

Wordfence Central is a powerful and efficient way to manage the security of multiple WordPress sites from a single console.

Rapidly assess the security status of all your websites on a single page.

View detailed security findings without leaving Wordfence Central and receive notifications when one of your sites experiences a security event.

Powerful templates make configuring the security of all your WordPress sites a breeze.

Wordfence Premium is for self-administered websites that are looking for the ultimate protection against the latest exploits including real-time firewall rules and malware signatures, a continuously updated Premium IP Blocklist blocking over 40,000 known threat actors, Country Blocking, and a security audit log to track security events.

Wordfence Premium users have access to our industry leading Premium ticket-based support.

Wordfence Response is for mission-critical WordPress websites that require 24/7/365 security monitoring with a 1-hour response time and 24-hour remediation.

Wordfence Response includes all the benefits of Wordfence Premium and Wordfence Care, and adds our rapid response team on standby to handle security incidents.

Wordfence Care is for business owners who place a premium on their time. Our team installs, configures, optimizes, and maintains your WordPress site security.

Wordfence Care comes with all the benefits of Wordfence Premium, and it includes hands-on support from our team during business hours (9am to 8pm US Eastern Time) along with incident response in the event of a security incident.

Wordfence Intelligence is an industry-leading WordPress vulnerability database and evolving Threat Intelligence platform that contains over 12,000 records for vulnerabilities in WordPress plugins, themes, and core.

The database is actively maintained by a team of highly credentialed and industry-leading vulnerability researchers and analysts with dozens of vulnerabilities added per week.

Wordfence CLI is an open source, high performance, multi-process security scanner, written in Python, that quickly scans local and network filesystems to detect PHP malware and WordPress vulnerabilities.

Wordfence CLI is open source under GPLv3. We offer both Free and Premium CLI license options. CLI Premium detects all known PHP malware – over 14 million malware variants.

CLI Free has a 30-day delay for malware detection.

CLI also detects over 11,800 WordPress vulnerabilities, including the very newest vulnerabilities, using our open and continuously updated vulnerability database. Vulnerability scanning is free for all license types.

SSL Security for Modern-Day Websites

Sectigo is one of the most recognized brands in online security, offering flexible and affordable certificate options that fit a wide range of needs.

From the cost effective Sectigo Essential certificate to Sectigo's fully featured EV option, there is a Sectigo certificate to fit any site that needs encryption.

HostWorldServices is also a provider of Corporate & Enterprise GeoTrust & DigiCert SSL certificates.

Corporate & Enterprise SSL

In today's digital landscape, maintaining the integrity and confidentiality of your organization's data is paramount.

HostWorldServices stands as a dependable ally for corporate and enterprise organizations, delivering unparalleled security solutions tailored to meet your unique needs. Specializing in top-tier SSL certificates, we ensure that your online transactions and sensitive information remain shielded against potential threats.

Partner with HostWorldServices for security you can trust—because when it comes to protecting your enterprise, compromise is not an option.

Contact us for an unbeatable price.

GeoTrust® is the world's second largest digital certificate provider.

More than 100,000 customers in over 150 countries trust GeoTrust to secure online transactions and conduct business over the Internet.

Our range of digital certificate and trust products enable organizations of all sizes to maximize the security of their digital transactions cost-effectively.

DigiCert is the trusted provider of Internet infrastructure services for the networked world.

Billions of times each day, DigiCert's SSL certificates, identity and authentication, allow companies and consumers all over the world to engage in trusted communications and commerce.

ID Protect

International rules require that valid contact information—known as Whois—is available for every domain name.

ID Protect cloaks your identity and provides proxy contact information in the Whois.

ID Protect also reduces spam. In your cloaked Whois information, we provide a proxy email address that changes several times a year. We forward email sent to the proxy address, but when the proxy address changes, spam sent to the old address bounces.

Blocks Spam

Your contact details are kept out of the hands of spammers, so you get less spam.

Keeps You Safe

ID Protect keeps your information private, so identity thieves can't find you.

Emails That Matter

Legitimate emails such as purchase offers for your domain are still forwarded to you.

ICANN Compliant

ID Protect follows rules set out by ICANN, the governing body for domain names.

SiteLock Security

SiteLock provides comprehensive website security for small businesses.

SiteLock offers online businesses a smart, cost-effective way to protect their business while increasing sales by over 10% through earning trust.

SiteLock's Trust Seal also provides customer confidence and has been proven to substantially increase sales and conversions, with 70% of web visitors looking for a verifiable 3rd-party certification before providing personal data.

Note: SiteLock can only be purchased and installed on domains registered or hosted with HostWorldServices.

Website Attacks Are on The Rise

Most site owners only think about security after their site gets hacked and blacklisted by Google. Prevent disruptions to your business and be proactive.

Clean up your site fast with instant alerts and an easy-to-use dashboard that clearly identifies issues and helps you locate them. With SiteLock, it's easy to eliminate malware and other viruses so you stay off search engine blocklists and keep traffic flowing.

Increase Sales with SiteLock

SiteLock provides a Trust Seal for secured sites.

With 70% of Web users looking for a verifiable 3rd-party certification before providing personal data, the SiteLock Trust Seal is proven to substantially increase your sales and conversions.

70% of customers look for a security seal

Let your customers know that your site is safe and that your business has been verified by displaying the SiteLock Trust Seal.

Malware Detection – Quick diagnosis of any harmful infections or malware on your business site

On-Demand Expert Support – Team of experienced website surgeons to repair any injuries, infections and bugs.

Blocklist Monitoring – Daily health check of your website to keep it off Google's blocklist and protect your business reputation

Vulnerability Identification – An X-ray of your website that discovers security holes, virus injections and weaknesses.
